

How to import pin's from another switch to the Matrix Switch?

The pin manager utility is a tool that can be user to Import external pines from other systems to the Matrix Switch. Following a sample of the structure of the pin file to be Imported to the Matrix Switch:

Filename : Pin.txt (You could name the file as you please.)

12764499785499,1,xtreme,10.00,1,60,101,100

Here is a brief description of the layout:

Pin Number, Account Number, Plan Name , face value, Announce 1=Yes 2=No,
Maximum call time, Control Number, Batch Number

If the system you are exporting the pins doesn't have the capability to set some of the fields we recommend you to use excel and import the file, alter the columns and then save the file in comma delimited.

Then run the pin manager, click on upload select the text file saved on your computer and choose whether to activate the pins or not.

You are done!

Matrix.
